

Dear Colleagues!

We have the great pleasure to invite you and your company for participation in the XIV International Biotechnological Forum-Exhibition "Rosbiotech-2020", which will be held on November 17-19, 2020 on the base of the Moscow State University of Food Production (MGUPP) (11, Volokolamskoe Shosse, Moscow).

This year the topic of the Forum is «Problems of biosafety for vital activity in today's context: present state, forecast and challenges».

The Forum will be held with the support by the Federation Council and State Duma of the Federal Assembly RF, the Ministry of Science and Higher Education RF, the Ministry of Agriculture RF, the Ministry of Health RF, Russian Academy of Sciences, Chamber of Commerce and Industry RF, National Guild of Producers and Importers. The organizers of the Forum are the MGUPP and the Gorbатов Federal Scientific Center for Food Systems RAS. The Department of Medical Sciences and Agricultural Sciences RAS, the Russian National Committee of the International Scientific Radio Union (URSI) will take participation in organizing of the Forum.

This year, the following actual problems of Medical and Agricultural Sciences will be discussed: Biotechnology in medicine and health care, Innovative approaches to the prevention, diagnosis and treatment of socially significant diseases, Actual agrobiotechnology to improve quality and safety of agricultural products, Solving the problems of nutrition and dietetics using FOODOMICS technologies, Actual technologies for functional and specialized food products, Actual technologies for environmental protection. Specialists from India, Italy, China, Poland, USA, Sweden, etc. have confirmed their participation in the Forum.

The Forum will allow Russian and foreign specialists to exchange experience and latest achievements in the development of biomedical technologies and ensuring biological safety of life in today's context, to identify trends in actual research and the creation of high-tech products in this area, to provide the availability of data necessary for the scientific and technological activities of young specialists, scientists, students and postgraduates. At the the Exhibition there will be presented the achievements of biotechnologies for many different spheres of life.

The Forum will include the competitions for innovative developments in the field of biotechnology, as well as the competitions for young scientists, inventors, postgraduates and students. According to the results of the competitions, the winners will be awarded by the

special prizes, medals and diplomas, and their projects will be reviewed by investment funds.
